

Job Title: Software Tester (Manual & Automation Testing)

Salary: Competitive

Location: Various

Job Type: Full-time, hours: 8.30am to 5pm

As a Software Tester in Ileero, you will help develop company's QA function and framework within the automation, Continuous Integration, Continuous Delivery, Web, Mobile, iOS, Android and OOP (Object Oriented Programming) environment. You will write, build and execute a comprehensive suite of test cases using manual testing and modern test automation framework. You will be working within an Agile Pod, carrying out cross browser testing, mobile and Web application testing for our newly released products.

Your daily activities will include specifying appropriate test cases, identifying new test cases, performing manual and automation test and recording results. You will also be exposed to raising defects in a defect management tool or collaboration tool. You will be maintaining an automated regression test pack and ensuring the best testing practices are implemented.

Requirements:

- Hold a bachelor's degree in Engineering, Computer Science or related field
- Understanding of Agile SCRUM, and Waterfall
- Familiar with network protocols such as TCP, IP, UDP, ICMP and ARP
- Good understanding of Linux, Windows & OS
- Experience testing web applications and mobile applications
- Knowledge of Microsoft Office products and outlook
- Use of Jira and Confluence to create and execute test cases

Essential Competencies:

- Experience writing and executing automated test scripts
- Knowledge of Open Source tools and GIT
- Ability to test Mobile, Web and business services
- Strong manual testing experience
- Strong analytical and problem solving skills
- Excellent communication and collaboration skills
- Cross browser and cross operating system testing

Desirable Skills:

- Understanding of BDD or TDD
- Selenium Web driver
- Knowledge of Java or Java script coding
- Experience of Test Automation Framework
- Knowledge of Jira, Confluence and Version One
- Knowledge of Performance automation tool such as JMeter, Load runner, SCAPA TPP
